

Human Consciousness Scientific Project in Germany.

**Magnetism® is a registered trademark of Miroslaw Magola**

The sceptics show in the media that they can adhere various objects to their torso. They try to duplicate the magnetic effect by bending slightly backwards and attaching objects onto slightly damp skin to imitate me.

I have the ability to lift objects made of metal, ceramic, wood or plastic off the floor, against the force of gravity. I hold them against my hands, and moves them vertically or in circles, without any aid.

If you can do similar things like this picture e.g holding objects against your hands or your head, and move them vertically or in circles; please contact me, I would like to you to join interdisciplinary scientific projects.

Human Consciousness Scientific Project in Germany.

Consciousness is the state or quality of awareness, or, of being aware of an external object or something within oneself.

It has been defined variously in terms of sentience, awareness, qualia, subjectivity, the ability to experience or to feel, wakefulness, having a sense of selfhood or soul, the fact that there is something "that it is like" to "have" or "be" it, and the executive control system of the mind.
